

How do you drive from **HERE** to **THERE** *without* polluting our **AIR?**

**Everybody's Talking About Plug-in Hybrids,
which combine the clean-driving benefits of
an Electric Vehicle with the range of a conventional hybrid.**

**"We should have a national program to
promote plug-in hybrid cars running on
electricity and biofuels."**

*--Robert F. Kennedy, Jr., Senior Attorney,
Natural Resources Defense Council*

**"...the next generation of hybrid vehicles
called plug-in hybrids that can be recharged
through a standard electrical outlet. Start
picturing what I'm talking about. You got
your car. You pull in. You plug it right in the
wall."**

--President George Bush

**"Yes, there is an infrastructure investment.
Each family would need an extension cord."**

*--James Woolsey, Former Director,
Central Intelligence Agency*

**"Vehicle emissions are the greatest challenge
that we must overcome to stabilize climate. The
plug-in hybrid approach seems to be our best
bet for controlling vehicle CO2 emissions in the
near-term."**

*--James Hansen, Director,
Goddard Institute for Space Studies, NASA*

**"Moving to these highly efficient plug-in gas-
electric hybrids could cut U.S. gasoline use
by 85%. Even more important, it could cut
automobile carbon emissions by some 85%,
making the United States a model for other
countries."**

*--Lester Brown, President,
Earth Policy Institute, author, Plan B 2.0*

Plug it in!

PLUG IN AMERICA

*Plug In America advocates the use of
plug-in cars, trucks and SUVs powered by
cleaner, cheaper, domestic electricity
to reduce our nation's dependence on petroleum
and improve the global environment.*

Join with Plug In America to advocate for
plug-in hybrids and electric cars.
